MEDITERRANEUM

ABOUT MÈZÈ

MÈZÈ products are top quality cooking and tableware utensils. These products are produced based on traditional knowledge, promoting the pleasure and the harmony of a family or a group meal.

Most of the MÈZÈ products are designed for the kitchen, the place where begins the ritual of a meal. However, the main inspiration of the MÈZÈ design is the table. In most cultures, tables are the place of intimacy and meeting of family and friends.

MÈZÈ joins tradition and contemporaneity in its design. It draws inspiration from the Mediterranean culture, a vast region full of light and a mild climate that is naturally conducive to gatherings and to sharing, resulting in a party of flavors, colors and aromas.

MEDITERRAEAN

The Mediterranean gathers a large group of countries facing a big sea that unites them all. There are several geographical, cultural and religious dierences amongst these countries but there are also many common elements.

The Mediterranean has a pleasant climate; it is a place of sun and light, where earth tones predominate, as well as some green vegetation. Its climate and proximity to the sea generates a number of common products that are consumed not only in these countries but also around the world. The taste for good food is a fundamental characteristic of the Mediterranean people.

On the other hand, the climate has also a strong influence on the way the Mediterranean people behave and the kind of relationships they establish between themselves. They possess a natural positivity, a lust for life and a common joyfulness. This type of character is closely linked to the way they eat, to what they eat, to the way they cook and to their concept of sharing a meal. The family structure is the basis of the Mediterranean people but they also love to live close to the community.

PRODUCTS

MÈZÈ products are shaped from traditional materials such as stone, wood, ceramics, glass, metal, natural fibers or cork resulting in contemporary objects, made by the hands of experienced and reliable designers. They respect these materials and create functional pieces either for our everyday life or for special occasions.

The various types of MÈZÈ pans and pots produced in enameled cast iron, an ancient technique that provides for the best food, allow different types of cooking. In complement to these products there are also basic accessories for the kitchen, such as food storage containers, bowls, boards, Mediterranean-inspired textiles and other specific accessories typical of this region, known around the world for its organic and natural food.

DESIGN

The MÈZĚ project has the designer Pedro Sottomayor as creative director, responsible for the pans and all the basic products of the collection. Soon other designers will join MÈZĚ to promote many different cultural views of the Mediterranean region.
